EDUCATION

Virginia Tech

Aug 2018 to Aug 2020

Degree: M.S. in Computer Engineering. GPA = 4.0/4.0 (Plan of Study)

Courses: Deep Learning, Advanced Machine Learning, Computer Vision, Big Data Text Summarization, Digital Libraries, Linux Kernel Programming.

Thesis topic: Extracting figures and tables from scanned Electronics Thesis and Dissertations (ETD).

About thesis: Using object detection to extract figures and tables from the PDF files of scanned ETDs to aid in downstream information retrieval tasks. (<http://hdl.handle.net/10919/100113>)

BITS Pilani

Aug 2011 to May 2015

Degree: B.E Honours in Electrical and Electronics Engineering. Overall GPA = 7.97/10.0

Courses: Digital Image Processing, Data Structures and Algorithms (unofficial audit), Data Mining.

WORK EXPERIENCE

Amazon

Sep 2020 to present

Software Development Engineer 2 (Amazon Fulfillment Technologies - TransferX).

Walmart Labs

June 2019 to Aug 2019

Summer Associate (Global Data Analytics Platform):

- Built a tool to move Big Data from on-premise Hadoop cluster to Google Cloud Storage using Apache Spark.

Flipkart Internet Pvt. Ltd.

July 2015 to July 2018

Software Development Engineer

- Built a web-scale service for e-commerce review images. (*Spring, Jetty, Couchbase, MySQL*)
- Built the feature of storing, moderating and serving product review images at web-scale. (*Spring, Jetty, Couchbase, CDN*)
- Developed a centralized moderation service to interface between Flipkart's systems and the moderation company's systems. (*Dropwizard, MySQL*)

PUBLICATIONS

Master's thesis: Extracting figures and tables from scanned Electronics Thesis and Dissertations (ETD). ([HTTP://HDL.HANDLE.NET/10919/100113](http://hdl.handle.net/10919/100113))

Classification and extraction of information from ETD documents

([HTTP://HDL.HANDLE.NET/10919/96645](http://hdl.handle.net/10919/96645))

Using Deep Learning to Summarize Theses and Dissertations (<http://hdl.handle.net/10919/86406>)

PROJECTS

Few shot deep knowledge distillation learning using Monte Carlo dropout

(Bayesian Deep Learning) Used Monte Carlo Dropout for enabling few-shot knowledge distillation from a teacher model into a student model.

Deep trajectory prediction of pedestrians using Monte Carlo Dropout for autonomous cars

(Bayesian Deep Learning) Trained an RNN (LSTM) to predict the trajectory of a pedestrian the probability distribution of possible trajectories using Monte Carlo dropout.

Deep task scheduler

(Linux kernel, Deep Learning, RNN) Using an artificial neural network to schedule tasks in Linux kernel

Linux kernel module for profiling the CPU time consumption of each process.

(Linux kernel, C) Developed a Linux kernel module to compute the the total amount of 'time' spent by each process on the CPU.

SKILLS

- Experienced in** developing deep learning models and web-scale software.
- Experienced in** Pytorch, Tensorflow, Scikit-Learn, Pandas, Numpy, Anaconda and Docker.
- Fluent with** Python, Java, C/C++, Linux/Bash, Git/Github, C#, and ReactJS.
